From The Director Project

I am very excited to join Mahavir International Delhi as Director (Projects). At this stage of my life in post-retirement, giving back to society is an undeniable urge, and serving lowest strata of our society is deeply satisfying. Equally satisfying was continued interaction with esteemed members who had 'love all, serve all' embedded deep in their hearts. While the commitment and importance to healthcare projects including eye care is visible all around, equally satisfying is my involvement in some of the environment related projects being initiated by MID.

Getting involved in improving internal controls relating to advances for eye/health camps and accounts thereof as well as reporting important parameters of each camp such as number of patients, different kinds of OPD cases, different medicines and spectacles distributed, was quite satisfying. I got to know most of the hospital in charges through this exercise. And, finally after convincing all stakeholders simplified formats were introduced.

Supervised some of the camps and was able to give suggestions for improved service through these mechanisms. Was able to add value to our new projects for improving 'environment'.

BE SAFE THIS DIWALI

Diwali, the festival of lights is just around the corner. A time for sweets and celebration with our loved ones, lighting beautiful lamps and bursting fire crackers. However did you know that more than half the firecracker injuries every year are related to the eye.

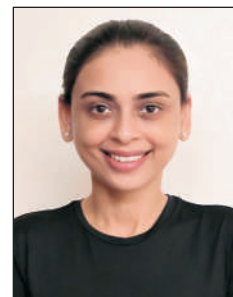

So it is very important for all of us to know how to protect our eyes and vision and avoid any accidents during the festivities. There are certain preventive measures that one can take to protect their eyes and avoid any unnecessary injuries.

These include:

1. **Maintaining Safe Distance** - While trying to light a firecracker one should keep their face away and arms outstretched and after burning it one should move at a safe distance to avoid any flying debris from entering the eye.
2. **Use Protective Glasses**
3. **Avoid contact lenses** - as the smoke from firecrackers can cause irritation.
4. **Care for irritation** - In case a tiny particle or smoke enters the eye causing irritation, one should avoid rubbing of eyes, as it may scratch the cornea. Instead one should Splash water on their face and eyes in an attempt to wash out any impurities providing immediate relief. If the irritation persists or if there is pain and discomfort visit the emergency department of any hospital close by and consult a doctor.
5. **In case of injury** - Such as unbearable pain or irritation or bleeding of the eye it's better to immediately rush to a nearby hospital and refer to an eye specialist. Do not rub, wash or apply an ointment to the eye as it may make the injury worse or difficult to examine.

Apart from these there are some basic rules that one must follow for prevention -

1. While playing with firecrackers, children should always be under the supervision of an adult.
2. Firecrackers should be placed in a closed box in a safe location away from the reach of children
3. Firecrackers must be burnt in an open environment and bought only from a licensed dealer by approved brands.
4. Always keep a fire extinguisher handy or atleast a bucket of water or sand to put off the fire.
5. Use long incense sticks to light a firecracker
6. Do not try to reignite a firework that did not go off.
7. Do not ignite them while holding it in your hands or while it's facing someone.
8. Diffuse used firecrackers properly by soaking them in a bucket of water before disposal.
